

## Advanced Banner Question

Do the banner question from lab 3 but now, the banner must be printed in a function called `printBanner`. This function takes no input and returns nothing. It prints the banner with a message as shown in the output below (similar message as in lab 3 banner). The function prompts the user to enter their first name, which is then printed in the banner.

You may assume that the line of stars has 50 stars in it.

*Please use loops this time!*

---

Sample Input:

Enter your first name: Dumbledore

Output:

```
*****
! ! ! ! ! ! ! ! ! ! ! ! ! ! ! ! ! ! ! ! ! !
*****
      Welcome to week 7 lab Dumbledore
*****
! ! ! ! ! ! ! ! ! ! ! ! ! ! ! ! ! ! ! ! ! !
*****
```
